

# ADRIÁN CENTURION

## FRONTEND DEVELOPER

I have a strong background in React and have successfully used it to create user-friendly interfaces. In addition, I have knowledge of Node and Express for backends. I have been working with these technologies for over a year and am eager to continue building my skills at a company that values collaboration and personal growth. I am looking for an opportunity to join a team where I can learn from others and contribute to the company's success.

## MOST RECENT EXPERIENCE

### Frontend Developer at No Country

November 2022 - December 2022 · [Bs. As., Argentina] · [Repo](#) - [Demo](#)

#### RESPONSIBILITIES

- Developed an e-commerce platform using React.js, TypeScript, Redux Toolkit, React Router, Formik, Yup, Tailwind CSS, and React Query on the frontend, focused on sports and movement.
- Collaborated with back-end and UX/UI teams to integrate functionality and design effectively and seamlessly, ensuring project synchronization.
- Implementation of TypeScript, a technology not previously used, to improve code quality and increase development efficiency in the project as requested.

#### KEY ACCOMPLISHMENTS

- Implementation of react-router configuration and permissions for admin, regular users, and non-logged-in users to control access to platform sections and functions based on user type and permission level.
- Creation of React Query hooks for API calls and improved data management to retrieve and update information and reduce server load.
- Implementation of Formik and Yup to create comprehensive and robust forms with validations and type checks, improving the quality and reliability of the forms and the user experience when interacting with them.
- Assisted with setup of Tailwind CSS and definition of overall platform styles.

### FullStack Developer at Alkemy

October 2022 - November 2022 · [Bs. As., Argentina] · [Repo Front](#) - [Repo Back](#)

#### RESPONSIBILITIES

- As part of a team of developers, contributed to the development of a wallet for easy virtual transactions using React.js, Redux Toolkit, React Router, Formik, YUP, Material UI, and Socket.io on the frontend, and Node.js, Express, Sequelize, JWT, Bcrypt, and Socket.io on the backend.
- Implement the SCRUM methodology to ensure efficient project management.
- Adhere to good practices and design principles, such as K.I.S.S. (Keep It Simple, Stupid) and D.R.Y. (Don't Repeat Yourself).

#### KEY ACCOMPLISHMENTS

- Implemented features such as user authentication, data validation, and data persistence using a database.
- Created a clean and intuitive user interface using modern design principles.
- Collaborated with a team of developers to plan, design, and develop the application using agile methodologies and pair programming.
- Successfully deployed the application to a live production environment.
- Resolved technical issues and bugs in a timely manner to maintain the application's uptime and performance.

## Frontend Developer Freelance

June 2022 - July 2022 · [Bs. As., Argentina] · [Transportes Marcelo](#)

### RESPONSIBILITIES

- Design and implementation of a visually appealing and easy-to-use interface for the landing page of a piano transport company.
- Implementing features such as contact forms, and galleries to showcase the company's services and capabilities.
- Ensuring that the landing page is responsive and works well on various devices and screen sizes.
- Testing the landing page to ensure it functions correctly and meets the company's requirements.

### KEY ACCOMPLISHMENTS

- Implementation of nodemailer to create a contact form that sends user inquiries and requests for quotes directly to the company's email, improving user experience and allowing the company to better serve its clients.
- Developed a landing page using next.js to improve the company's online presence, taking advantage of next.js' superior SEO capabilities compared to React and resulting in higher search engine rankings and increased visibility.
